

Michael Troy Swayney

Charleston, SC | (704) 576-6507 | Mswayney@gmail.com | michaelswayney.dev

Army veteran with experience in military, hospitality operations and data center construction, transitioning into AI use case development with a focus on practical problem-solving, workflow optimization, and AI-assisted solutions.

PROJECTS

Windows XP Interactive Portfolio · Personal Project

2024 – Present

- ▶ Developed a fully interactive, browser-based Windows XP environment using HTML, CSS, and JavaScript as an alternative to a traditional portfolio website.
- ▶ Designed a desktop-style interface allowing users to navigate applications, open files, and explore projects interactively.
- ▶ Leveraged AI-assisted development tools to accelerate learning, troubleshoot functionality, and refine front-end design and user experience.

Unified Restaurant OS Concept · Applied AI Use Case

2024

- ▶ Conceptualized an AI-assisted restaurant operating system designed to unify fragmented hospitality tools and streamline front-of-house and kitchen workflows.
- ▶ Identified operational inefficiencies through firsthand experience using Toast, JONAS, and other restaurant management platforms in high-volume environments.
- ▶ Proposed features including offline functionality, workflow consolidation, and AI-driven operational support to reduce system complexity and staff workload.

EXPERIENCE

Server & Bartender · [Mex1 Coastal Cantina, Charleston SC](#) Aug 2023 – Nov 2024

- ▶ Ran high-volume service in a fast-paced environment, managing a lot of moving pieces simultaneously and staying composed when things got hectic.
- ▶ Used Toast POS every shift, which ultimately became the foundation for the AI use case project above.
- ▶ Coordinated with kitchen and bar teams to keep service running smoothly, even under pressure.

Server & Bartender · [Seabrook Island Golf Club, Seabrook Island SC](#) Mar 2023 – Aug 2023

- ▶ Delivered precise, detail-oriented service in a private club setting with high expectations and little margin for error.
- ▶ Managed member accounts and billing in JONAS POS, adding another system to a growing working knowledge of hospitality technology.

IBEW Electrician · [Google Data Center Projects, Ridgeville, SC & Moncks Corner, SC](#) Nov 2024 – Mar 2026

- ▶ Performed electrical installation and construction work on large-scale commercial data center projects for Google.
- ▶ Installed underground & overhead seismic conduit, electrical panels, Shiraz interconnects and other supporting components, wire pulling, terminations.

United States Army · [Human Resource Specialist \(SPC\)](#) May 2004 – Apr 2007

- ▶ Managed troop accountability, personnel records, and unit readiness for formations of up to 400 personnel; processed military finance and pay transactions, resolving discrepancies and ensuring accurate, timely disbursements.
- ▶ Administered leave and mail operations while preparing awards, evaluations, and official personnel documentation.
- ▶ Deployed to Iraq (2005–2006): sustained personnel administration in an operational environment, executed emergency personnel actions, under combat conditions.

EDUCATION

A.A.S. in CNC Machine Technology · [Central Piedmont Community College, Charlotte NC](#)

- ▶ Studied CNC machine programming, G-code, blueprint interpretation, machine setup, and precision manufacturing processes using manual and CNC milling and lathe equipment. Developed experience troubleshooting machining operations, maintaining tight tolerances, and translating technical specifications into accurate machine instructions.

SKILLS

Prompt Engineering | AI-Assisted Development | Toast POS | JONAS POS | CNC / G-code
